Sea Technology Index

Volume 26, 1985

This instant reference index of technical subjects and news appearing in Volume 26, (1985) of *Sea Technology* magazine appears in three parts: Part one—subject index; part two—authors; and part three—monthly contents listings. Numbers following subjects and authors in parts one and two indicate month/page number.

Part One
SUBJECT INDEX

Accident reporting, marine 7/9
Accuracy, navigation data (article) 8/23
Acoustics
  product development (article) 11/28
  systems testing (article) 6/34
Airborne radar, monitoring, (article) 8/27
Airborne spectrometer, mapping (article) 8/34
Air cushion vehicle 2/50
Algae, record depth discovery 2/57
Anchor systems (article) 9/47
Antifoulant coatings, testing (article) 6/38
Antisubmarine warfare
  classification sonar 8/46
  DoD budget trends 1/29
  DoD organization (editorial) 11/7
  Navy organization (Soapbox) 11/77
  superconductivity systems (article) 11/10
  satellite imagery (article) 11/35
Arctic, Federal research (editorial) 4/7
  engineering symposium 1/74
ARGOS, data dissemination (article) 4/60
Arrays, handling systems (article) 7/15
Artificial gills (article) 1/60
Artificial intelligence 1/11
Atlases, environmental data (article) 8/16
Atmosphere, measurements (article) 10/66

Beach erosion (article) 5/29
Bering Sea current study 3/81
Boston Sea Rovers 11/9
Bridge equipment, ship (article) 6/16
Budgets, ocean
  1986 Federal proposals (article) 3/35

Chesapeake Bay geology study 5/49
China, hyperbaric diving system 5/65
Classification of NOAA data 4/52
Coast Guard, traffic control (article) 6/20
CODAR, surface currents (article) 10/43
Color imagery, satellite (article) 8/43, 11/35, 11/39
Communications
  river craft network (article) 5/24
  satellite (article) 5/10

Compensaions, ship motion (article) 9/47
Connectors, rope (article) 9/51
Corrosion prevention (article) 6/42
Currents
  CODAR measurements (article) 10/43
  expendable profiler (article) 2/24
  radar measurements 8/50

Data bases
  fisheries (article) 2/30
  marine pollution (article) 8/16
Data processing
  ARGOS satellite (article) 4/60
  classificaion of NOAA data 4/52
  hydro surveying (article) 1/65
  modular systems processing 5/54
  oceanic satellites (article) 4/45
DDT, Lake Michigan 7/44
Defense Mapping Agency (profile) 6/28
Defense policy (editorial) 2/7
Deployment
  array systems (article) 7/15
  survey towfish (article) 7/10
Digital mapping, spectrometer (article) 8/34
Department of Defense
  defense policy (editorial) 2/7
  procurement structure 8/81
Diving
  commercial industry forecast 1/31
  launching system 10/90

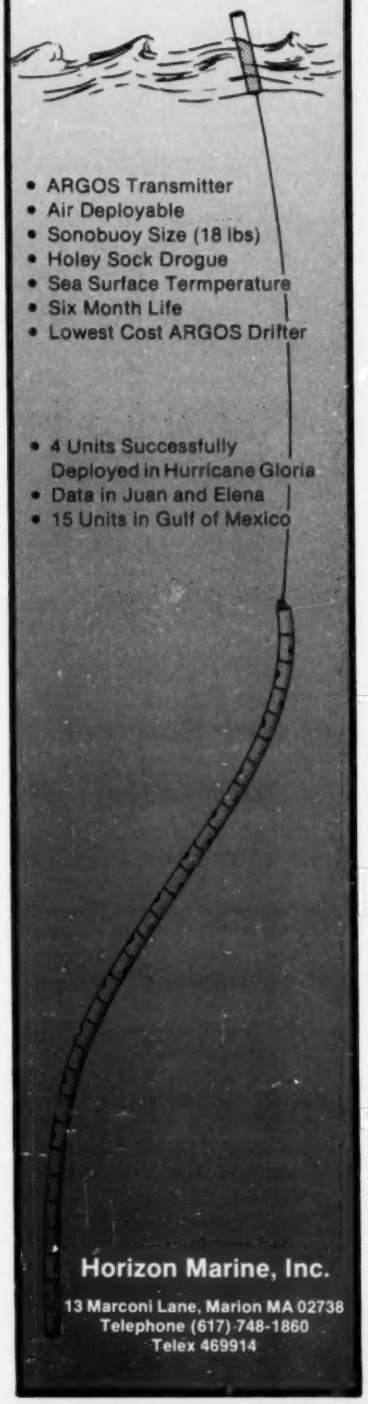
  Navy requirements 10/83
  personnel (article) 4/55
  ROV personnel training (article) 4/67, 12/30
  tools (article) 2/43
DSV Sea Cliff 7/45
Drillship mooring system (article) 7/34
Dumping, ocean 10/76

Easter Plate survey (article) 7/27
Economics, ocean resources (article) 10/10
Education
  marine student conference (article) 2/34
  oceanographers (article) 10/57
  satellite generated data 10/82
  Navy fellowships 11/57
Electronic charts
  applications of systems (article) 4/38
  integrated system (article) 4/29
El Nino
  early warning sensors 7/47
  fisheries study 6/51
  forecast model 3/81
Environmental data accuracy (article) 8/23
Environmental monitoring, radar (article) 8/27
EPC Labs Inc. (profile) 10/36
Exclusive Economic Zone
  classification of survey data 3/66
  Gulf of Mexico mapping 1/75, 9/9
  development issues (article) 10/31
  mapping 8/47, 10/85
  survey plans (article) 2/12

(Continued on page 34)

FAR HORIZON

DRIFTER



- ARGOS Transmitter
- Air Deployable
- Sonobuoy Size (18 lbs)
- Holey Sock Drogue
- Sea Surface Termperature
- Six Month Life
- Lowest Cost ARGOS Drifter

- 4 Units Successfully Deployed in Hurricane Gloria
- Data in Juan and Elena
- 15 Units in Gulf of Mexico

Horizon Marine, Inc.

High Resolution Depth Sounder for Depths to 5000 Meters

The Raytheon DSF-6000 Digital Survey Fathometer® provides high resolution profiles from 0 to 5000 meters (16,405 feet). Simultaneous dual frequency operation offers a choice of 12, 24 or 40 kHz in combination with 100 or 200 kHz. Nine levels of shading. Generous 235mm (9 inch) chart width. Ranges switch selectable in feet, fathoms or meters. Major functions, customarily offered as options, are standard, built-in features. For details, contact **Raytheon Ocean Systems Company, Westminster Park, East Providence, RI 02914 USA Telephone (401) 438-1780. TELEX 6814078.**

(Continued on page 38)

TEMPERATURE:
WHEN AND WHERE YOU NEED IT

The **Model TBT-10 Temperature Monitoring Buoy** samples up to four channels of temperature data with an accuracy of +/− 0.25°C. An internal transmitter delivers the data via RF-link.

- **real-time data via RF-link**
- **up to 4 channels/transmission multiples available**
- **single thermistor or thermistor chain**
- **self-contained and portable**
- **simply elegant!**

Part Three
MONTHLY CONTENTS

January 1985

An Amorphous Community—*Editorial* 7
Sea Technology Annual Review and Forecast—Introduction 10
'Great Leap Forward' Leaves NOAA Behind 11
Artificial Intelligence & Robotics 11
Oceanography from Space: Status & Outlook for 1985 17
1984: A Year of Transition for the Offshore Industry 19
1985: Fifth Anniversary for NOIA's TPC 22
Submersible Business Holding Its Own 24
Marine Science Report: Bad News, Good News 26
Geophysical Activity: Steady As She Goes 27
ASW Budget Share Shows Downtrend 29
Commercial Diving Industry Will Face Greater Demands 31
Those Who Go Down to the Sea Are Still Using Submersibles 34
Hazardous Waste Burning at Sea Appropriate 36
Fisheries Bills Set for 99th Congress 38
The Marine Technolcoy Society—1985 39

The SEASTAR *IN SITU* WATER SAMPLER

- ultra trace extraction of organics, PAH's, PCB's, hydrocarbons and trace metals.
- you select: flow rate, volume, sampling mode
- self powered
- reuseable columns
- microprocessor controlled
- large volume extraction
- optional filter assembly
